Account Minimum Balance Requirements and Charges

Affinity Current Account

There are no minimum balance requirements to operate your account.

However, if the total monthly balance of all your accounts with us, such as Current Account, Savings Account and Fixed Deposit Account falls below 250 currency units, administration charges may apply. Monthly Average Balance calculation is done on the Customer ID level.

The administration charge is calculated by adding the daily closing balance of all your accounts with us for the month and dividing it by the total number of days for that month. The following administration charges are applied to your account on the basis of your monthly average balance:

Total Monthly Average Balance (Currency Units)	Administrative charge for the respective month (Currency Units)
250 and above	0
250 -0	3

These charges will be levied on the Affinity Current Account.

Non-Individual Current Account

There are no minimum balance requirements to operate your account.

However, if the total monthly balance of all your accounts with us, such as Current Account, Savings Account and Fixed Deposit Account falls below 1,000 currency units, administration charges may apply. Monthly Average Balance calculation is done on the Customer ID level.

The administration charge is calculated by adding the daily closing balance of all your accounts with us for the month and dividing it by the total number of days for that month. The following administration charges are applied to your account on the basis of your monthly average balance:

Total Monthly Average Balance (Currency Units)	Administrative charge for the respective month (Currency Units)
1,000 and above	0
500 - 1,000	3
Upto 500	5

These charges will be levied on the Current Account.

Fixed Deposits

With Premature Withdrawal option:

In case a fixed deposit is withdrawn prematurely, do note that the Bank may not pay all the interest accrued from the time of opening the fixed deposit up to the time of its premature withdrawal. Additionally, there is also a premature withdrawal fee of 1% flat, payable on the principal amount and interest (on the amount considered by the Bank to be payable as interest), subject to protection of only the principal amount and not the interest accrued. Please visit our branches and check with our branch staff for more details and consider carefully before performing a premature withdrawal of your fixed deposit

For example:

A person wishes to close his 2 year fixed deposit prematurely.

Scenario A. Where closure is within 30 days of opening the deposit, no interest would be payable.

Scenario B. Where deposit is held for a period greater than 30 days.

If deposit sought to be withdrawn is held for period for which deposits are offered by Singapore Branch (3, 6, 12, 18, 24 months and so on)	If deposit sought to be withdrawn is held for a period that falls between two tenures for which deposits are offered by the Singapore Branch	If interest has been paid out
Interest calculated at the rate applicable for deposits of such tenure (as existing at the time of opening of the deposit sought to be withdrawn), less the premature withdrawal fee of 1% flat on the principal and on the interest, subject to protection of only the principal	Interest calculated at rate applicable for deposits of the shorter of the two tenures (as existing at the time of opening of the deposit sought to be withdrawn), less the premature withdrawal fee of 1% flat on the principal and on the interest, subject to protection of only the principal	The premium is adjusted against any payment due to the customer, this would mean that even in cases where principal is protected, the amount returned could be less than the principal to the extent of interest already paid out to the customer.
So, in this example, if he is closing prematurely in exactly one year, since Singapore branch offers one year deposits, customer will get the rate which a one year deposit offers (when he had opened his two year deposit) less 1% withdrawal fee on principal and interest	Hence, in this example, if he would break the deposit in 15 months, the customer would still get the rate which a one year deposit offers (when he had opened his two year deposit) less 1% withdrawal fee on principal and interest	

Without Premature Withdrawal option:

The Fixed Deposit cannot be closed by the depositor before expiry of the term of such deposit. However, the Bank may allow premature withdrawal of these deposits in following exceptional circumstances: in the event of any direction from any statutory and/or regulatory authority or deceased claim settlement cases. In the event of premature withdrawal of these deposits under abovementioned exceptional circumstances, the Bank will not pay any interest on the principal amount of the deposit. Any interest credited or paid upto the date of such premature closure will be recovered from the deposit amount.
